

3rd WU - Workshop in Applied Econometrics (WUWAETRIX³)

May 28, 2015 (Besprechungsraum D4 Building, 2nd floor, WU-Campus, Vienna)

9:00 - 9:45	Konstantin Wacker (Johannes Gutenberg-University Mainz)	Measuring financial stress using composite indicators and the effect of capital flows: Evidence from emerging economies
9:45-10:30	Max Kasy (Harvard University)	Labor demand and wage inequality - an empirical Bayes approach
10:30-10:45	Coffee Break	
10:45-11:30	Angela Bitto (WU)	Achieving shrinkage in the time-varying parameter models framework
11:30-12:15	Stefanie Peer (WU)	Selection-bias in reward experiments: evidence from a real-life peak avoidance experiment among train commuters
12:30-13:15	Lunch Break	
13:15-14:00	Gertraud Malsiner-Walli (JKU Linz)	Bayesian variable selection in semi-parameteric growth regression
14:00-14:45	Alyssa Schneebaum (WU)	Gender differences in wealth
14:45-15:00	Coffee Break	
15:00-15:45	Kristina Hrvolova (EUBA and Hochschule Luzern)	Dynamic model approach to bank profitability determinants
15:45-16:30	Alexander Ahammer (JKU Linz)	Is there a causal effect of income on mortality?
16:30-17:15	Bernhard Schmidpeter (JKU Linz)	The effect of child's health on parental labor market outcomes
